Our Roasters Delight Blend was accidentally created one day by one of our roasters who found it to be a delightful surprise in the cup. After a bit of tweaking with the blend components the cup qualities were refined to a level of excellence that our roasters were satisfied with. Needless to say it has been a favorite ever since and has become one of our bestsellers. The coffee is sweet clean tasting and bright with that genuine specialty coffee taste. The juicy taste makes you want more with delicate nuances of ripe plum, raspberry, and apricot. The creamy white chocolate character is delicious and the high quality mellow taste is a delight in the cup it is best at medium roast. Try it today and discover how this coffee earned its name - Roasters Delight.
