Natural Christmas Mint - No mint, no additives, just natural bean nuance creating a flavor profile similar to a christmas mint flavored coffee. One of our roasters put up the challenge to match the flavor profile of the popular christmas mint flavored coffee with natural bean nuance only. The resulting cup is surprising similar, not really a distinct mint but a natural coffee taste that is very similarly refreshing and delightful. Vibrantly bright and cheery in nature, smooth and sweet, but quite energetic. We like it black but also good with cream. Naturally refreshing!
