baking spice | pumpkin | brown sugar

Natural Pumpkin Spice Coffee - No additives, just natural bean nuance with a flavor profile similar to pumpkin spice flavored coffee. We blended a select set of beans together that have natural baking spice notes and roasted them to a light roast to allow more of a pumpkin type flavor to develop. The results are a cup that is surprisingly reminiscent of pumpkin spiced pie. There are definite baking spice tones throughout set off by that light roast “pumpkin type” taste. If you add a dash of cinnamon and cream, bingo you pretty much got your 100% natural healthy pumpkin spice notes in a coffee that can be enjoyed anytime.
