Natural Rainforest Crunch - completely natural bean flavors that naturally taste like traditional rainforest crunch flavors. We got requests for those natural nutty taste notes so we set out to blend a few of our beans with natural taste nuances to produce a taste that is near to the expected rainforest crunch taste. In this blend there are natural nuances of hazelnut, macadamia, almond, vanilla, caramel, and wild honey. The sweet nutty character of this blend makes for a nice light roast coffee. The coffee is clean tasting smooth with a pleasant finish. If you like natural nutty notes in your coffee this blend may be what you are looking for. Completely natural bean nuances no flavoring added at all. Best at lighter roast levels from cinnamon to medium.

NET WT 16 OZ | 1 POUND | 453 G
