Natural Southern Pecan - A blend of beans with all natural taste nuances similar to those of fresh southern pecan pie just out of the oven. Rich nutty notes like pecan with a deep caramel like sweet base of complex flavors like vanilla, honey, caramel, butter, graham cracker, and cane syrup, with a nice pleasant clean finish. The buttery character of this coffee balances the rich nutty vanilla honey tones. The cane sugar sweetness adds a juicy mouthfeel. Crafted for medium roast where the sweetness and buttery nutty nature is at its peak. Brew as AeroPress or espresso add cream if desired. The Latin American beans in this blend make a well balanced cup of coffee for those liking nutty notes.
