soft caramel | butter | cane sugar

Natural Sweet Cream - Sweet creamy buttery coffee nuances with no flavoring at all. Only natural bean nuances at work here. The resulting coffee character is roundly full with a rich creamy buttery mouthfeel bursting with vibrant natural sweetness and smooth mildly pleasant complexity. There are nuances of vanilla, soft caramel, butter, cane sugar, and cooked apple in the juicy sweet finish. This is a coffee you want to drink black to savor all the natural bounce and creamy buttery sweetness it presents in the cup. Unmatched in its smooth buttery sweet character and is a real treat as a pour-over, piccolo, or flat white with no other additives needed at all. Best at light roast to medium roast level where sweetness and creamy butteriness is at its natural peak.
