Natural Vanilla Bean Latte - No additives, just natural bean nuances from coffee beans. This blend is centered around vanilla bean notes. We choose a few specific bean types that would combine well creating a really nice, completely natural, vanilla like flavor. This coffee is bright clean and juicy tasting with good vanilla tones, as well as nuance of butter and white chocolate, citrus, lime, ginger, and cranberry. Our Vanilla Bean Latte coffee is good for drinking black or with steamed milk if desired. Recommended brew is pour-over or espresso. Crafted from African beans, best at full city roast for better vanilla like taste development in the cup.
