s'mores | dark chocolate | green apple

Kerplunk - the sound of a coffee cup hitting the counter in need of another refill... This coffee blend was created to make a perfect full city roast. Rich and clean tasting, like a pure coffee taste with soft roasty background notes. The impressive nutty character carries this blend. There are soft nuances of hot s'mores, caramelized sugar notes, and green apple. This is the kind of coffee you want to drink black and just savor the rich complexities of the cup. Nothing fruity or wild just that good fresh taste of specialty coffee done right. With just a hint of soft roasty background notes for those who enjoy a light roasty taste and when balanced by the natural sweetness of the roast it makes for an empty cup that needs refilling often... Kerplunk!
