Go Getter - an energizing coffee blend for those who like to get things done! Uniquely smooth tasting with a interesting depth of cup character. It opens with a nutty lemongrass leading edge with nuance of cocoa, walnut, and salted peanut. The cup can be a bit strong on its own and a little cream and sugar may set it off just about right. This particular blend was crafted from our beans that contain the highest levels of natural caffeine making it a real energy booster with plenty of get up and go. At the medium roast level the taste is lighter and a bit more mellow, at darker roasts it will become more roasty and a bit more chocolate forward. Crafted for standard drip brewing.
