dark chocolate | fudge | wafer roll

Hey wait a minute... Ya we know we got stuff to do... “but first coffee” nothing happens until after coffee because; life begins after coffee! Satisfy your coffee cravings with our - But First Coffee Blend - nuance of dark chocolate fudge, chocolate wafer rolls, and triple chocolate ice cream, with a lingering cocoa note in the dry finish. Created for those wanting strong dark chocolaty notes in their coffee at the full city roast level when “drinking it black”. When taken darker to espresso roast, or Italian roast, these notes get much more intense which may be best if adding cream and sugar to the cup. The premium African beans in this blend give it bit of sweetness and a clean taste. Great for drip or percolator brewing.
