Back Slappin Good - Playing off brotherly comradery like when he nails it and makes the touchdown. This coffee is strong intense full bodied and in charge. No questions. The heart of this blend is our Sulawesi beans to which we add choice Guatemalan beans and prime Ethiopian beans. This powerful blend works together to form a robust character. Deep rich earthy tones, full syrupy body notes, nuance of chocolate fudge, dried fruit, licorice, and vanilla with a nice lingering finish that has a bit of baking spice in it. This complex structure would be more expected at a darker roast but Back Slappin Good was crafted for the full city roast lover and the full city roast is really important here because it develops a vibrant character loaded with more natural taste nuance.
