nutty | chocolate | caramel

Finally a blend for those who just want a good cup of coffee! People are always asking us for a blend with Colombia and Guatemala beans so here it is... By combining two favorite growing regions we get a well balanced coffee with good complexity, but no fruity notes, just that genuine “good coffee taste” that comes from specialty coffee beans roasted right. There are pleasing nutty, chocolaty, caramel notes tied together with a lively acidity and mellow richness that feels like it must be glowing with goodness. This goodnatured blend is equally tasty at lighter roasts or darker roasts but our standard roast for this blend will be our medium roast. Just ask for “The Good Stuff” whenever you need more coffee! It is so satisfying. Try it today.
