Whatcha Callit Coffee - is a blend for those who aren't quite so picky about their coffee. If you enjoy good fresh roasted coffee but do not have to know or need to really taste all those delicate nuances then this may be the blend for you. This blend comprised of 100% freshly roasted coffee of "your choice of roast level" provides good fresh roasted coffee at a steeply discounted price. Why? Because the beans in this blend are a collection of the surplus amounts from today's production run. For example our large drum batches have an extra amount of bean surplus from different roasts. Then at the close of each roast day we combine the same roast level of beans all together to create Whatcha Callit blend. You choose the roast, & we will use the beans we have on hand roasted today.
