Bulls Eye Espresso - This blend was created with a specific target in mind, a roundly full mellow taste, for light milk drinks like a piccolo, cappuccino, or a latte. We wanted the chocolate notes to have a satisfying depth without being overpowering, with just the right amount of intensity, but with a nice interesting complexity that adds excitement to the drink experience. This is one of the few espresso blends we have that uses Ethiopian Yirgacheffe as a blend component “this would be important to the African coffee lovers”. The bottom line is our Bulls Eye Espresso hit the bulls eye for light milk espresso drinks with natural nuances of dark chocolate, vanilla, molasses, caramel, and wild honey. Crafted for the medium roast style, a firm mellow intensity.
