milk chocolate | brown sugar | orange

The old water powered Clarks Mill is a local landmark. This mill was once an essential place in the local community as a source of fine flour and cornmeal. It was the gathering spot to buy goods and to catch up on local gossip. Much like the old mill our Clarks Mill Special coffee has become an essential part of the morning routine for the light roast lover. When naturally powered by water at 200°F this harmonious blend is crowd friendly and makes for fine conversation. The light roast makes a clean tasting cup with pleasant nuances of milk chocolate, brown sugar, orange, hints of cooked pear in the finish. It is one of our house specials specifically created for the light roast lover to brew as Pour-Over, AeroPress, or Espresso.
