chocolate | earthy | nutty

A cappuccino made with espresso is creamy and balanced with a strong rich coffee flavor softened by a smooth sweet layer of foamy steamed milk. It is the combination of dense espresso and steamed milk that creates the balanced profile. For our signature Cappuccino Blend we crafted a blend of beans that are naturally nuanced as chocolate forward with a rich earthy nutty depth to back up the chocolaty goodness. The low natural acidity of this blend welcomes the addition of cream or frothed milk creating that balanced smooth and rich taste you would expect from a cappuccino blend. With or without milk our Cappuccino Blend creates a comforting robust cup of coffee that is best at the full city roast level.
